Art Unit: 2651

1. The IDS has been considered. Kuki is cited as of interest.

- 2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
- 3. Claims 23-33,56-66,89-99 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.
- 4. Applicant's election with traverse of claims 1-22, 34-55, 67-88 in Paper No. 6 is acknowledged. The traversal is on the ground(s) that the species searches will overlap. This is not found persuasive because the applicants have failed to submit evidence showing that the species are obvious variants.

The requirement is still deemed proper and is therefore made FINAL.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless ~

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2651

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 6. Claims 1,12,34,45,67,78 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,185,175, hereinafter "Zook".

 Zook shows a recorder/player apparatus, and associated method, comprising equalizer
- 74, and noise correlation, storing, white noise calculator, and input signal arithmetic 95, col. 9, II. 20-50, col. 10, II. 25-50.
- 7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 8. Claims 1-22,34-55,67-88 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrases in claims 1,12,34,45,67,78 drawn to "input signal patterns of the present and past or future", and deviation and correlation of noises are unclear. Relative to what?

Art Unit: 2651

The phrase in claims 3,14,36,47,69,80 drawn to "one-precedent to the present state to the present state in the past and the future" is vague.

The phrase in claims 4,15,37,48,70,81 drawn to "only the past or future as targets" is indefinite.

The phrase in claims 6,17,39,50,72,83 drawn to "an MTR restriction and the like" is unclear.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan Faber whose telephone number is (703) 308-4816. The examiner can normally be reached on flextime (M-F).
